PROFILE SUMMARY

Motivated BSc IT student with a strong foundation in Python programming and a growing interest in Artificial Intelligence and Machine Learning. Passionate about solving real-world problems using data-driven approaches and eager to gain hands-on experience in AI/ML development. Seeking an opportunity where I can apply my technical skills, learn from experienced professionals, and contribute to innovative projects.

KEY PROJECTS

Heart Disease Prediction

- Built a machine learning model to predict the likelihood of heart disease from patient health data using Python and Scikit-learn.
- Performed data cleaning, feature analysis, and model evaluation to improve prediction accuracy.

Student Performance Prediction

- Developed a predictive model to estimate student academic performance based on historical and behavioral data.
- Applied data preprocessing, visualization, and regression/classification techniques using Pandas, NumPy, and Scikit-learn.

Personal Portfolio

- Built a personal portfolio website showcasing skills, projects, and contact information.

Weather App

- Developed a web application that fetches real-time weather data using an API and displays it to users.

Networking Fundamentals

- Studied the OSI Model, IP addressing, and switching & routing basics.
